

## Print Work Orders with Attachments from Discrete Manufacturing in Oracle EBS

AventX prints work orders with corresponding attachments directly from the discrete manufacturing module of Oracle EBS. As a complete work order package printing solution, AventX overcomes the limitations associated with native work order printing. The result is increased profitability from improvements in operational efficiency and manufacturing accuracy.

*AventX makes effective use of your time by automating discrete manufacturing work order package printing. What used to take hours can now be done automatically in a matter of minutes.*

## Deliver the right documents to the right people, right now.

Automatic work order package printing eliminates man hours spent on printing and collating discrete manufacturing work orders with their attachments. Additionally, eliminating manual intervention reduces common errors associated with work order printing and assembly.

- ▶ **Assure quality.** Confidently print work orders knowing your packages contain the most up-to-date attachments, everytime.
- ▶ **Meet safety and compliance standards.** Never miss a critical piece of documentation when all required attachments print automatically with the work order.
- ▶ **Get to work faster.** Eliminate hours of manual printing and collating so you can use your skills and energy on more fruitful endeavors.

### Key Product Features:
