AVENTX®

AventX for ONESolution offers users the ability to fax and email directly from SunGard Public Sector's ONESolution software. AventX is a fully integrated, host-based, and unattended software solution that significantly reduces manual document delivery costs by automating workflow of business-critical documents.

Advanced Functionality

Seamless Integration
Any document that can be printed from the ONESolution application can also be automatically faxed or emailed.

Desktop Fax Compatible
Fax directly from other applications such as MS Word and Excel. Integrates with Microsoft Outlook, Novel GroupWise, IBM Lotus Notes, SMTP, 32 bit-client, and web client.

Apply Multiple Signatures
AventX uses "If/Then" logic to dynamically place graphics based on information in the data.

Version Independent
Compatible with all versions of ONESolution. AventX functions as a printer in ONESolution, allowing user processes to remain unchanged.

Delivery Confirmation
Receive confirmations for success or failure of documents via Fax, Email, Print, File, and Web.

Multiple Attachments
Provides the flexibility to attach dynamic cover pages and terms and conditions. Additionally, AventX supports file attachments from Microsoft products including Word and Excel.

Professional Output
Any document may be enhanced with the addition of logos, graphics, and signatures.

Scalability
Capable of transmitting tens to thousands of documents per day with extensive routing and monitoring capabilities.

Critical Benefits

- ROI measurable in months
- Streamline daily operations
- Enhance productivity
- Employee time savings
- Achieve paperless initiatives
- Reduction of operating costs
- Compliance with regulatory and security requirements
- Verification of documents' receipt
- No customizations required
- Scalability
- Ninety-day money-back guarantee

Any document. Any format. Any volume.
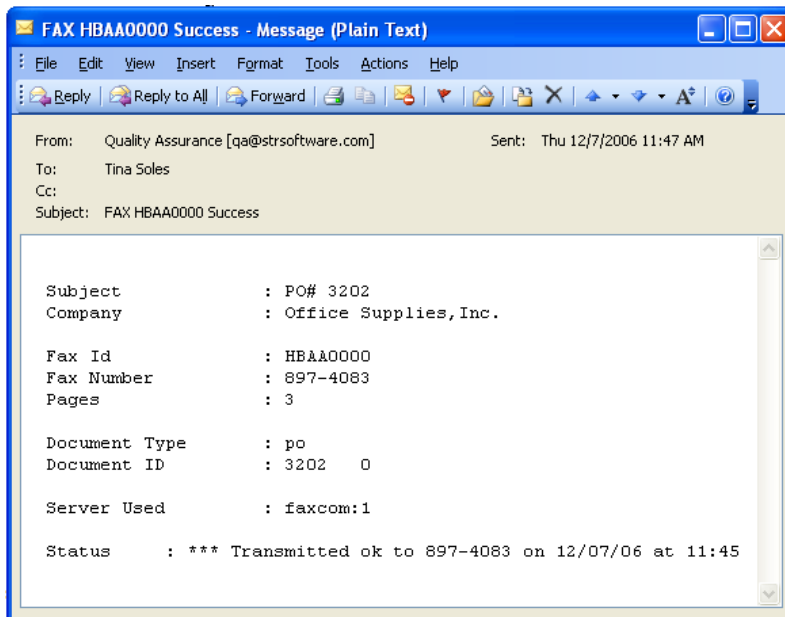

STR software

Submission

Submit documents and select destination information directly from the ONESolution application. Document examples include: POs, RFQs, acknowledgements, INVs, bids, A/P reports, check stubs, etc.

Transmission

Delivery via your choice of email, internet fax (ASP), or a network fax server.

Acknowledgement

Users receive detailed confirmations by email and have access to daily, weekly, and monthly transmission reports.

Document Management

AventX WebManager provides users with web-based system administration, document reporting, and management tools. Users can modify, retransmit, cancel, or delete the transmission of single or multiple documents. Documents may be sorted by status, PO#, supplier, telephone number, email address, etc.

About AventX

The AventX Product Suite is developed, marketed, and supported by STR Software. Specializing in document delivery since 1986 for fax, email, and internet fax, STR Software is known for providing "Solutions That Run" with over 1,000 licenses sold worldwide. The AventX Product Suite integrates with host ERP applications including ONESolution, BusinessPLUS, Oracle E-Business Suite, PeopleSoft, and SAP in UNIX, Linux, MPE, and Windows environments.

Save time. Reduce costs. Improve productivity.
