Print from Oracle EBS Without UNIX Printer Management

AventX Print Xpress is a bolt-on solution designed to eliminate the burden of setting up and supporting printers in Oracle E-Business Suite. With seamless integration that looks and feels like Oracle, AventX simplifies EBS printing by allowing users to print to any printer, whether it's across the hall or across the country.

"Before, I inadvertently found myself operating as a printer technician...With AventX, we're no longer maintaining printers in Oracle. It's made a positive impact on our business."

__Wade Zimmerman, Business Application Manager Life Care Services__

Print All Your Oracle EBS Reports Anywhere, Anytime on Any Printer

AventX Print Xpress simplifies printing from Oracle EBS with transparent, out-of-the-box capabilities that enable users to immediately print reports to any printer. With no need for end-user training, new drivers or additional hardware, AventX automates the entire printing process from Oracle EBS allowing you to:

▶ **Eliminate the burden of manually maintaining printers in Oracle EBS.** IT resources can focus on other priorities without the hassle of setting up, maintaining and supporting printers in Oracle. AventX provides easy access to log files and displays real-time job status in an Oracle form to make troubleshooting more efficient.

▶ **Give users flexible printing options without changing their current process.** End-users continue to print with the familiar Oracle interface, but with the newfound ability to send reports to their PC's default printer, any local network printer or view them onscreen as a PDF file. Printing with AventX also allows users to adjust their own printing preferences without IT resources.

Key Product Features:

▶ Automatically print any report to locally attached, secure or network printers

▶ Automatically print associated attachment files with any report

▶ Monitor and troubleshoot in real-time through a centralized Oracle form

▶ Guide the cloning process through built-in utilities to import and export system configuration

▶ Store scheduled jobs for printing upon user's next EBS login so nothing gets lost
